ASSIGNMENT FOR FRONT END DEVELOPER IN CX TEAM

RETURN TO Marta.Luczak@F-Secure.com

F-Secure.

CODING A B2B APPLICATION

- Your assignment consists of coding a B2B application into HTML+CSS.
  - You may design an application from scratch based on description on next page
  - Or simply code the example UI provided at the end of this material

- Your success will be judged based on
  - UX quality: components appear accurately in the UI
  - Code quality: simple, responsive code
  - You do not have access to F-Secure icons but may use stock icons or placeholders

- Return the app as HTML+CSS (preferably ZIP, with src) and design notes to Marta.Luczak@F-Secure.com
  - Some JS framework also, at least few components, no need to code all

- Please spend 2-3 hours on this task

F-Secure

OPTION 1) TICKET MANAGER APP

- Design a simple web app for managing tickets assigned to a team of admins, primarily for Desktop but works on a mobile device (responsive layout)

- Use cases
  - Create a new ticket from scratch, with severity (low, medium, high), status (new, acknowledged, in progress, closed, archived), assigned to (person responsible), title, description and notes (incl attachments)
  - User can find tickets assigned to them
  - User can edit attributes
  - User can sort tickets according to different criteria
  - User can see an overall status of how many tickets are in which phase on handling

- * Note this option is more work that option 2, but this is an opportunity to show possible UI/UX design skills
